## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Young, III et al.

Young shows the communication system as illustrated in figure 1 that includes the power line interface 30, an analog front end processor 26, a physical layer 22, a back end interface 18, and a computation device 16.

The limitations as recited in claims 2 and 3 are clearly provided within the blocks of figure 1 and illustrated in the specific structure with respect to the blocks in figures 2A, 2B, and 2C, see for instance the channel map generator in figure 8 and Figure 11.

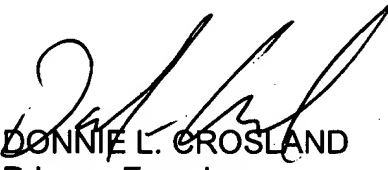

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ben-Michael et al, Lu et al, and Beukema are cited as showing related systems for communicating between devices.
